At Borrás Dry Cleaners
we can clean, repair and
preserve your gown,
bringing it back to it's
former glory.

Wedding gowns come in all manner of styles and designs, some embellished with beads and sequins, others with delicate lace, silks and ribbons, each present their own challenge when it comes to cleaning.

With over 40 years
experience we know exactly
how to clean and preserve
your gown.

Once your gown has been fully cleaned to our high standards we then make any repairs requested such as hems, frays and button/bead re-attachment.

Finally, your gown will be expertly folded and wrapped in acid free tissue and stored in your chosen box preserving it in an ideal environment for long term storage.
